

## GENERATORS

We supply an extensive range of high-quality pre-built, ready to go, open or canopy, standby or prime, diesel generators in single or three-phase 5 kVA - 3500 kVA for commercial, industrial, construction and residential applications.

If required, we can custom design and build diesel generators to meet your specific requirements and application, including size, economy, exhaust, noise, alternative fuels and containerisation.

Generator control systems can include automatic mains fail, synchronisation, load sharing, peak lopping automatic transfer switches, autostart systems and more.

## MAINTENANCE, SERVICE, FAULT RESPONSE, SPARE PARTS & REFUELLING

A key aspect of Dependable Power is dependable back up and service. Our commitment is reflected in our people and our facilities, plant, and stock kept on hand to ensure fast response times when a system has failed. We are available 24 hours 7 days for service and fault response with our qualified team of Diesel technicians, fully qualified electrician plus diesel refuelling service.

Dependable Power has a network of local agents and contractors to provide immediate support and response. Critical in preventing untimely failures and outages is regular preventative maintenance, also available 12A IQP certification to assist with BWOFF. We offer comprehensive service packages to suit your needs. Contact our service team for advice on which service package best suits your requirements and generator application.

## DESIGN & INSTALLATION

Complete generator installation service from design, delivery, installation, fuel systems, fuel tanks, noise attenuation, controls, exhaust, commissioning, cooling and certification, seismic constraints.

With our turnkey power solutions, Dependable Power will insure you not only get the perfect power supply for your needs, but that you have all the technical support and back up available 24/7.

## HIRE

Need a generator temporarily for emergency back up, in an emergency, or to power your construction project? We have a large fleet of generators from 10 kVA - 1500 kVA and Load Banks for hire to suit your needs.

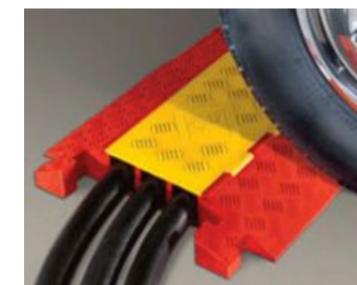

Talk to our service team for advice on your requirements and application.

## POWER PRODUCTS

We are also an importer and distributor of competitively priced electrical components and cable protection products for the New Zealand market.

Industrial plugs & sockets IP44/ IP67, enclosures, rubber cable protector, weatherproof switches, portable distribution boxes and Deep-Sea Controller.

Dependable Power Ltd (Appleby Engineering) is a leading supplier and installer of diesel generators in New Zealand and the South Pacific Basin. No matter how large or small your project, you can rely on us to deliver dependable power when and where you need it!

With over 45 years of industry experience, the company was set up by John Appleby. The business has evolved over the years to become a premier supplier of generators and downstream equipment. Our supply chain leads to an unrivalled range of products. Included within our scope are suppliers such as Deutz, Volvo, MTU, Perkins, Cummins, Mecc Alte and Newage Stamford. Unique build controls and instrumentation are sourced from Deep Sea Electronics and other leading brands.

What makes us different is the integrated approach to the solutions we offer. Developing solutions requires capacity analysis and project management skills, knowledge, expertise and most of all experience with a proven track record Dependable Power ticks all the boxes.

This means we can provide a complete solution whatever your industry or requirements. Get in touch today to ensure a Dependable Power supply for your business, when and where you need it.

Dependable Power has the experience and technical know-how required for your job. We have delivered turnkey solutions to a wide range of projects and industries, including the following:

**Industrial:** You can depend on us to deliver in any situation requiring a constant and reliable power supply. This solution could be in IT or for manufacturing stability, order processing and logistics. If the objective is reduced energy costs, we can supply peak-opping or base-loading options.

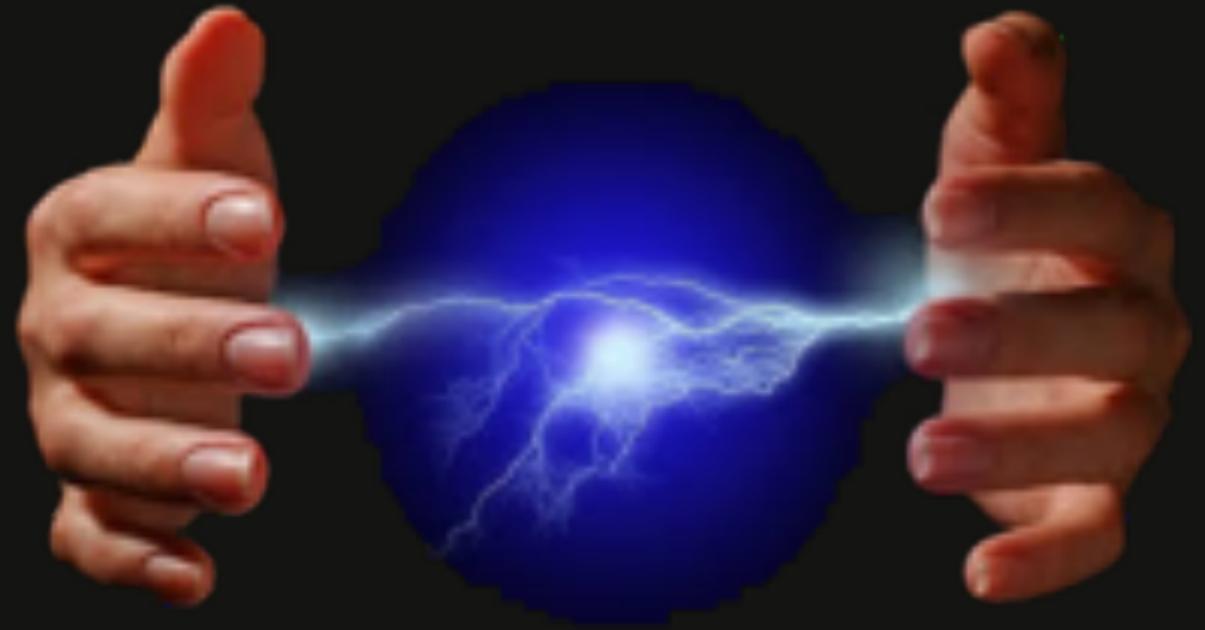

**Communications:** Our generator solutions provide a guaranteed continuous supply of power to ensure service continuity and the integrity of data and devices.

**Public and Civil Services:** Hospitals, highways, public transport, medical centres or water treatment plants, we provide complete power solutions that guarantee supply with minimal interruption for these critical services.

**Agricultural:** Our experience and knowledge cover power supplies for irrigation, dairy and agricultural farm applications.
